## COMBINE CLIMATE-FRIENDLY HEI-CHILL PELTIER

## MADE IN GERMANY

The average operational lifespan of 10 years is backed by a 3 year warranty and makes your purchase a worthwhile investment.

## Thermostat Hei-CHILL Peltier

Chilling - Heating - Process integration

Environmentally friendly as no internal refrigerant is used.

The thermostat has a temperature range of –10 °C to 70 °C and can also be used for smaller reactors with a working volume of 5 liters.

The power of 600 W is sufficient, also for chilling tasks when using rotary evaporators

Thanks to the plug-in system, the tubes are quickly connected to each other - thus, the connection of the device is ensured by simple steps.

The compact size of  $27 \times 43 \times 43$  cm enables the use on laboratory benches

Different interfaces: Ethernet, RS 232 and RS 485 allow the integration of the thermostat in processes
